

- Administration** (209) 468-3411
 Supports major functions of the Department such as: Department Management, health statistics and reporting, personnel, accounts payable, purchasing, payroll processing, expense reimbursement claims.
- Black Infant Health Program (BIH)** (209) 953-7074
 Provides support, education, and referrals for high-risk African-American families and infants up to one year of age; empowerment-focused group support services and case management.
- Birth Certificates and Other Vital Records** (209) 468-8600
 Registers births, deaths and fetal deaths occurring in the county. Provides certified paper copies of birth certificates and other vital records (e.g., death certificates).
- California Children's Services (CCS)** (209) 468-3900
 Statewide program that coordinates and pays for medical care and therapy services for eligible clients under 21 years of age.
- Cal-Learn** (209) 468-3880
 Provides support, education, and referrals for pregnant and parenting teens receiving CalWORKs cash aid, to help them finish high school or get a GED.
- Child Health and Disability Prevention Program (CHDP)** (209) 468-8335
 Provides oversight to CHDP medical providers and community clinics as well as connects low-income children and children in foster care to community resources in relation to preventative health care, treatment services and diagnostic referrals for ages 0 - 21.
- Child Passenger Safety Program** (209) 953-7309
 Provides one-on-one car seat installation assistance to parents and caregivers by appointment at PHS and at community check-up events, conducts car seat education classes in the community.
- Childhood Lead Poisoning Prevention Program (CLPPP)** (209) 468-2593
 Provides education and resources for the community in order to raise awareness of the dangers of lead poisoning. Home visitation and inspections are also available for children found to be severely lead-poisoned.
- Chronic Disease and Injury Prevention Programs** (209) 468-3368
 Works with community partners across the County on strategies to reduce the risks associated with diabetes, hypertension, and other chronic conditions (e.g., healthier diets, more physical activity, monitoring blood pressure, appropriate medications). Also, works with traditional and non-traditional partners on the prevention of injuries (e.g., as a result of traffic, pedestrian, and bike crashes, senior falls, drowning, suffocation, poisoning, etc.).
- Communicable Disease Control Program** (209) 468-3822
 Conducts case investigation of reportable communicable diseases, outbreak management, contact identification, patient and community education, and consultation to physicians, infectious disease practitioners, nursing facilities, schools, and day care programs.
- Emergency Preparedness Program (EP)** (209) 468-9361
 Provides education and training to improve public health emergency readiness for individuals, families and the community-at-large.
- Epidemiology** (209) 468-9841
 Provides surveillance and monitoring of health data as well as supporting programs' needs for health-related data (e.g., social determinants of health); shares health information with the community through data reports and requests.
- Fetal Infant Mortality Review Program (FIMR)** (209) 468-3004
 Member of Countywide multi-disciplinary team that reviews fetal and infant deaths to identify, develop, and implement recommendations that will improve community resources and health service delivery systems for women and children. The goal is to reduce the

overall number of deaths as well as the disparity of fetal and infant deaths among African Americans.

- In Home Supportive Services (for Elderly, Blind and Disabled)** (209) 468-2202
Nurses assess homes and provide referrals and recommendations to families.
- Laboratory** (209) 468-3460
California State and Federally certified facility that provides high-complexity testing services for San Joaquin as well as a number of neighboring Counties.
- Maternal, Child, and Adolescent Health Program (MCAH)** (209) 468-3004
Set of integrated programs designed to improve the health of California's women of reproductive age, infants, children, and adolescents, and their families.
- Medical Therapy Program** (209) 943-6361
Provides Physical Therapy and Occupational Therapy for children with physical disabilities up to age 21 years with a qualifying medically eligible condition.
- Nurse Home Visiting Program** (209) 468-3004
Conducts home visits for high-risk families with infants; nurses conduct developmental assessments, provide parent education, and make care referrals.
- Nutrition Education and Obesity Prevention Program (NEOP)** (209) 468-3842
Conducts education, outreach, as well as policy, systems, and environmental changes to promote increased access to and consumption of healthy foods and beverages, physical activity, and food security with the goal of preventing obesity and related chronic diseases.
- Public Information and Communication** (209) 468-3571
Develops and coordinates communication and outreach strategies from PHS to the community (e.g., programs' educational materials, social media activities) as well as maintaining media relations.
- STDs/HIV/AIDS Programs** (209) 468-3820
Coordinates STD and HIV/AIDS related services. Provides counseling as well as education and prevention services that include street-based outreach and activities at schools and correctional facilities; case management to assist persons living with HIV/AIDS.
- STOPP Smoking Prevention Program** (209) 468-8211
Works in partnership with the Smoking & Tobacco Outreach and Prevention Coalition to promote a tobacco-free county.
- STOPP Helpline* (local number)** (209) 468-2415
Makes referrals to community programs to help stop smoking.
- Sudden Infant Death Syndrome Program (SIDS)** (209) 468-3004
Provides supportive services, referrals, and education for families experiencing the death of an infant due to SIDS.
- Tuberculosis (TB) Control Program** (209) 468-3828
Provides support and treatment for clients with active TB, as well as seeking out others in contact with that person to assess if they, too, have been infected and need treatment, referral, and monitoring.
- WIC Program (Supplemental nutrition program for women, infants, and children)** (209) 468-3280
Helps families by providing nutrition education and breastfeeding support, issuing checks for healthy supplemental foods, and making referrals to healthcare and other community services.
- Quality Improvement (QI) Program** (209) 468-2183
Guides QI activities within PHS. Applies the principles of continuous QI to enhance the quality of PHS services to the community as well as internal day-to-day operations. QI efforts rely on teamwork to solve problems together.
